RE: MWCIA Announces Release of Manage USR

Minnesota Workers' Compensation Insurers Association, Inc. (MWCIA) is pleased to announce the release of Manage USR. This product, now available to member carriers of MWCIA, was specifically designed to provide an online view of unit statistical data through the MWCIA website (www.mwcia.org).

Manage USR is a web-based application for our data providers to manage accurate submissions and facilitate the correction process. The Data Provider has the ability to view individual USRs, their status and edit failures. A WCSTAT file of the rejected reports can be created to download into your system or into BEEP software. The corrections can then be made and a file resubmitted to MWCIA.

We hope this tool will prove to be beneficial to our member carriers. If you wish to utilize the Manage USR product, a registration form is available on our website at:

www.mwcia.org/mwcia_manageUSR/form.htm

If you have any questions regarding Manage USR, please direct them to our Data Quality Department at 952.897.1737, Option 4.
