RE: New WCUNDERWRITING Web Service Product

The Minnesota Workers' Compensation Insurers Association, Inc. (MWCIA) is pleased to announce a new Web Service product that allows the automated (system-to-system) real-time retrieval of up to five years of experience modification and merit rating history, as well as current insured names and addresses. The data is returned in XML format, based on the Workers Compensation Insurance Organizations (WCIO) WCUNDERWRITING XML standard.

Access to the WCUNDERWRITING Web Service product is provided through MWCIA's Web Membership system. Member carriers with a Web Membership account may obtain WCUNDERWRITING Web Service authentication keys via Web Membership, and develop an automated connection to the WCUNDERWRITING Web Service. Real-time experience modification information may then be requested as needed using the insured's Risk ID or FEIN.

For more information on Web Membership, including Web Service setup, please see the Web Membership user guide. For technical information on the WCUNDERWRITING Web Service, please see the MWCIA WCUNDERWRITING Web Service Implementation Guide. Both of these guides, as well as all MWCIA Web Membership product user guides, are available on our website <https://www.mwcia.org/WebMembership/Login.aspx>.

If you have questions about the WCUNDERWRITING Web Service product, please email WebMembership@mwcia.org.
